SAMEED SIDDIQUI

AI & Backend Software Engineer

Karachi, Pakistan | +92 347 5264129 | sameedsiddiqui9@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineer specializing in Backend Development and Applied Generative AI, combining strong foundations in Python, FastAPI, Node.js, Express.js, and MongoDB with practical experience in LLM fine-tuning, model evaluation, and on-device inference. Proven track record across engineering internships and contract engagements in architecting secure RESTful APIs, authentication systems, and integrating AI capabilities into production web and mobile applications. Blends a Computer Software Engineering background with final-year BBA training to align scalable backend architecture with product goals.

TECHNICAL SKILLS

- **AI / GenAI:** LLM Fine-Tuning (SFT, LoRA, QLoRA), 4-Bit Quantization, Unsloth, DeepEval (Pre and Post score evaluation), Model Evaluation (Correctness, Answer Relevancy), Hugging Face, On-Device Inference (llama.cpp, GGUF, Gemma), Prompt & Temperature Tuning, Azure AI Fundamentals
- **Backend & APIs:** Python, FastAPI, Node.js, Express.js, RESTful API Architecture, JWT Authentication, Bcrypt, Zod Schema Validation
- **Frontend & Mobile:** React.js (v19), Next.js 14, React Native (Expo), JavaScript (ES6+), Tailwind CSS, NativeWind, Vite, Redux Toolkit, Zustand, PWA (Service Workers)
- **Databases & Storage:** MongoDB, Mongoose ODM, MongoDB Atlas (Cloud Sync), IndexedDB (Dexie.js), AsyncStorage, Offline-First Data Architecture
- **Engineering & Tooling:** Git, GitHub, Monorepo Architecture, Postman, Vercel, Kaggle (T4x2 GPU Pipelines), PRD & Technical Documentation, Agile / Jira / Trello

EXPERIENCE

Generative AI Engineer (Contract) | AI SLM Project, Remote *Apr 2026 – Present*

- Fine-tuned Google's Gemma 4 (2B) small language model (SLM) for Offline Car Specialist GPT QA using SFT and LoRA/QLoRA with 4-bit quantization on Kaggle T4x2 GPUs via Unsloth, improving Correctness by 59.8% relative (0.390 to 0.623) across three versioned adapters while holding Relevancy at 0.922.
- Own end-to-end engineering execution including PRDs, technical requirements, experiment tracking, dataset curation, fine-tuning pipelines, held-out evaluation, and FastAPI backend integration.
- Benchmark each adapter iteration against held-out test sets using rigorous correctness and answer-relevancy metrics to govern production release gates and retraining cycles.

Microsoft Azure AI Fundamentals Trainer (Part-Time) | Online *Aug 2026 – Present*

- Deliver live technical training sessions and YouTube lectures on Microsoft Azure AI Fundamentals (AI-900 / AI-901), covering core machine learning principles, computer vision, NLP, and Azure AI services.
- Develop certification-focused instructional modules with hands-on cloud demonstrations, architectural walkthroughs, and exam-oriented guidance.

MERN Stack Developer Intern | 10Pearls Pakistan, Karachi *Dec 2025 – Mar 2026*

- Architected and built an end-to-end Note Management System using Node.js, Express.js, MongoDB/Mongoose, React.js, and Tailwind CSS, implementing stateless JWT authentication, Bcrypt password hashing, and protected REST API routes from schema design through UI.
- Shipped sprint deliverables on schedule within an Agile workflow, resolved code-review feedback, executed end-to-end functional testing, and maintained a clean, traceable Git/GitHub commit history.

Web Developer Apprentice / CMS Developer Intern | Digital Auxilius, Karachi *Dec 2024 – Jul 2025*

- Engineered responsive, cross-browser frontend interfaces from design wireframes in direct collaboration with UI/UX and backend teams, earning an early promotion from Apprentice to Intern.
- Integrated CMS platforms and third-party REST APIs, debugged and resolved live production issues, and incorporated code-review feedback across iterative release cycles.

Web Developer (Part-Time) | ITLytical Ltd, Remote (UK) *Jul 2024 – Oct 2024*

- Delivered frontend engineering tasks and resolved UI/functional issues asynchronously for a distributed UK-based team, maintaining consistent sprint velocity across time zones.

PROJECTS

Car Specialist AI | *On-Device Automotive LLM Assistant (Web + Mobile)* github.com/ssiddiquiii/car-specialist-gpt

- Built an offline-first, dual-platform automotive AI assistant using React (Vite), FastAPI, React Native, and 4-bit quantized Gemma 4 (2B) GGUF models with fully local on-device inference.
- Engineered offline-first state persistence with AsyncStorage and automated MongoDB Atlas cloud synchronization for user accounts and chat history, featuring temperature-based dual-response generation.

FocusFlow | *Local-First, Distraction-Free Learning Dashboard (PWA)* github.com/ssiddiquiii/FocusFlow

- Built a local-first React 19 Progressive Web App (PWA) for YouTube learning utilizing Dexie.js (IndexedDB) for client-side persistence, timestamped note-taking, and automated course resume tracking.
- Implemented custom keyboard media controls, Zod-validated JSON data backup/restore pipelines, and service-worker caching deployed on Vercel.

Fleure Beauty | *Full-Stack E-Commerce Platform (Mobile + Admin Web)* github.com/ssiddiquiii/fleure-beauty-monorepo

- Architected a unified monorepo combining a customer-facing React Native/Expo mobile app (NativeWind, Redux Toolkit) and a Next.js 14 admin management portal backed by MongoDB and Mongoose.

EDUCATION

Higher National Diploma in Computer Software Engineering | Aptech Pakistan, Karachi *Grade: B+ | Nov 2020 – Nov 2023*

Bachelor of Business Administration (BBA) | Iqra University, Karachi *CGPA: 3.61/4.00 | Oct 2022 – Feb 2027*

Certifications: Microsoft Certified: Azure AI Fundamentals (AI-900 / AI-901).
